

Building a more sustainable world, **one pallet at a time.**

Green Scorecard

Initiatives Explained

About Our Green Scorecard

With a 95% recycling rate, the ability to repair and reuse, and the positive impacts on healthy forests, wooden pallets are inherently sustainable. Since 2016, Kamps has tracked and reported on this sustainability via three key metrics: Trees Saved, Land-fill diversions, and Carbon Saved. These metrics were published via our “Green Scorecard 1.0”.

Since 2016, Kamps, and the world, has changed. Our impact on supply chains continues to grow, via service and product extensions. Carbon off-sets and other sustainability metrics are becoming an increasing priority for our stakeholders.

Because of this, Kamps has taken steps to expand our Green Scorecard into an entire system of initiatives that positively impact all of Kamps’ stakeholders.

YOUR PLATFORM FOR CUSTOMER SERVICE

1 Action & Impact

Through our recycling efforts, and environmentally conscious products, we strive to make a positive impact on our environment and local communities.

Examples

Kamps Sustainable Pallet Cycle
2022 G75 Award

2 Measure & Report

Kamps collects the data on our environmental impact and reports on this data in the most transparent and accurate fashion possible.

Examples

2021 Environmental Sustainability Report

3 Value & Support

Kamps uses this data to create customer specific reports, further adding value to our customers’ supply chain and helping them tell their own sustainability story.
