

Building a more sustainable world, **one pallet at a time.**

Kamps Sustainable Pallet Cycle

About Our Pallet Cycle

Since 1973, Kamps has focused on maximizing the value of every pallet, at every stage of its life-cycle. We call this process "Harvesting The Urban Forest". As Kamps continues to grow, so does our ability to harvest greater volumes and varieties of pallets.

As a national organization, with integrated operations spanning multiple business units and companies, we have the capabilities to cover supply chains with end-to-end pallet solutions - ensuring zero wood pallet waste and maximum environmental benefits.
