

Building a more sustainable world, **one pallet at a time.**

Green Scorecard

Initiatives Explained

About Our Green Scorecard

With a 95% recycling rate, the ability to repair and reuse, and the positive impacts on healthy forests, wooden pallets are inherently sustainable. Since 2016, Kamps has tracked and reported on this sustainability via three key metrics: Trees Saved, Land-fill diversions, and Carbon Saved. These metrics were published via our “Green Scorecard 1.0”.

Since 2016, Kamps, and the world, has changed. Our impact on supply chains continues to grow, via service and product extensions. Carbon off-sets and other sustainability metrics are becoming an increasing priority for our stakeholders.

Because of this, Kamps has taken steps to expand our Green Scorecard into an entire system of initiatives that positively impact all of Kamps’ stakeholders.

YOUR PLATFORM FOR CUSTOMER
SERVICE

Action & Impact

Through our recycling efforts, and environmentally conscious products, we strive to make a positive impact on our environment and local communities.

Examples

Kamps Sustainable Pallet Cycle
Awards & Recognition

Measure & Report

Kamps collects the data on our environmental impact and reports on this data in the most transparent and accurate fashion possible.

Examples

2021 Environmental Sustainability Report

Value & Support

Kamps uses this data to create customer specific reports, further adding value to our customers' supply chain and helping them tell their own sustainability story.

Kamps Sustainable Pallet Cycle

About Our Pallet Cycle

Since 1973, Kamps has focused on maximizing the value of every pallet, at every stage of its life-cycle. We call this process "Harvesting The Urban Forest". As Kamps continues to grow, so does our ability to harvest greater volumes and varieties of pallets.

As a national organization, with integrated operations spanning multiple business units and companies, we have the capabilities to cover supply chains with end-to-end pallet solutions - ensuring zero wood pallet waste and maximum environmental benefits.

Awards & Recognition

About G75 Award

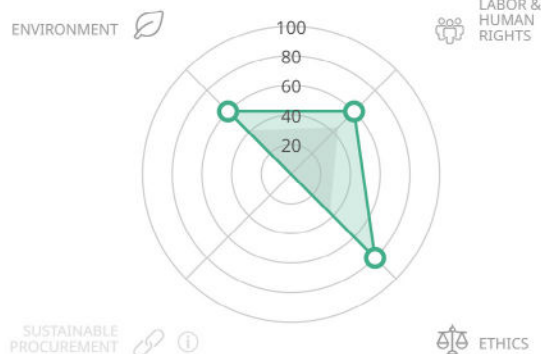

The G75 award is an annual editors' choice list awarded by Inbound Logistics magazine highlighting 75 companies that go above and beyond to ensure their supply chains are sustainable, and that their operations are socially and environmentally friendly.

About EcoVadis Rating

EcoVadis operates an evidence-based online platform, providing supplier sustainability ratings and allowing companies to assess the ESG performance of their global suppliers.

In 2023, Kamps completed our inaugural audit and scored in the Top 25% of all EcoVadis companies audited, earning us a Silver medal.

● All companies rated by EcoVadis in this industry.

OneTreePlanted

In 2023, in recognition of Earth Day, Kamps partnered with OneTreePlanted and funded the planting of 1,000 trees in U.S. forests.

2022

Environmental
Sustainability
Report

About Our Report

The Environmental Sustainability Report (ESR) details our broad environmental impact, from both corporate and operational stand-points.

Our ESR is the next step in the evolution of our Green Scorecard initiatives, ensuring that we are tracking, reporting, and making actionable progress on items that our stakeholders deeply care about.

Key Highlights From Our ESR

- 2022 Carbon Footprint Analysis
- Fleet Route Optimization
- 2022 Carbon Off-Sets
- Green Energy Report

Green Scorecard Certificate

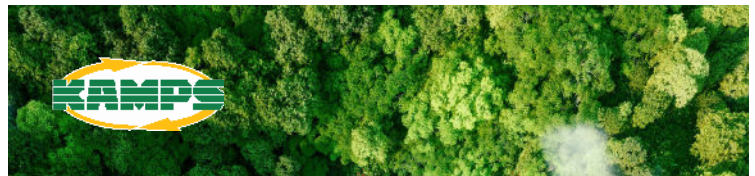

Value & Support

Our Green Scorecard Certificate is a document that is provided by Kamps to all of our customers and vendors participating in sustainable operations.

From pallet recycling and carbon off-sets to trees saved through recycling programs or custom designed pallets. Backed by the latest research available, our Green Scorecard Certificate is the industry leading report that certifies your supply chain's green efforts via Kamps programs.

Our certificate is continuously monitored for accuracy and evolving. Based on customer feedback, a potential new addition to the report is a Supplier Diversity addendum tracking Kamps' spend on diverse suppliers.

CERTIFICATE OF SUSTAINABILITY

This Certificate is presented to **YOUR COMPANY®**

For the positive environmental impact on our planet through Kamps, Inc.® pallet recycling programs

Pallets Recycled or Purchased	25,951
Trees Saved 	1,364
Tons of Landfill Waste Diverted 	480
Metric Tons of CO2 Emissions Off-Set 	730

Pallets Recycled Data generated from Kamps, Inc. recycling operations. Environmental metric data is based on the EPA Waste Reduction Model (WARM) for "dimensional lumber." It is derived by taking the difference between the net CO2 emissions produced by landfilling and the net CO2 emissions produced by recycling dimensional lumber.
