

COMPREHENSIVE PALLET LIFE-CYCLE SERVICES (CPLS)

BENEFITS & ADVANTAGES

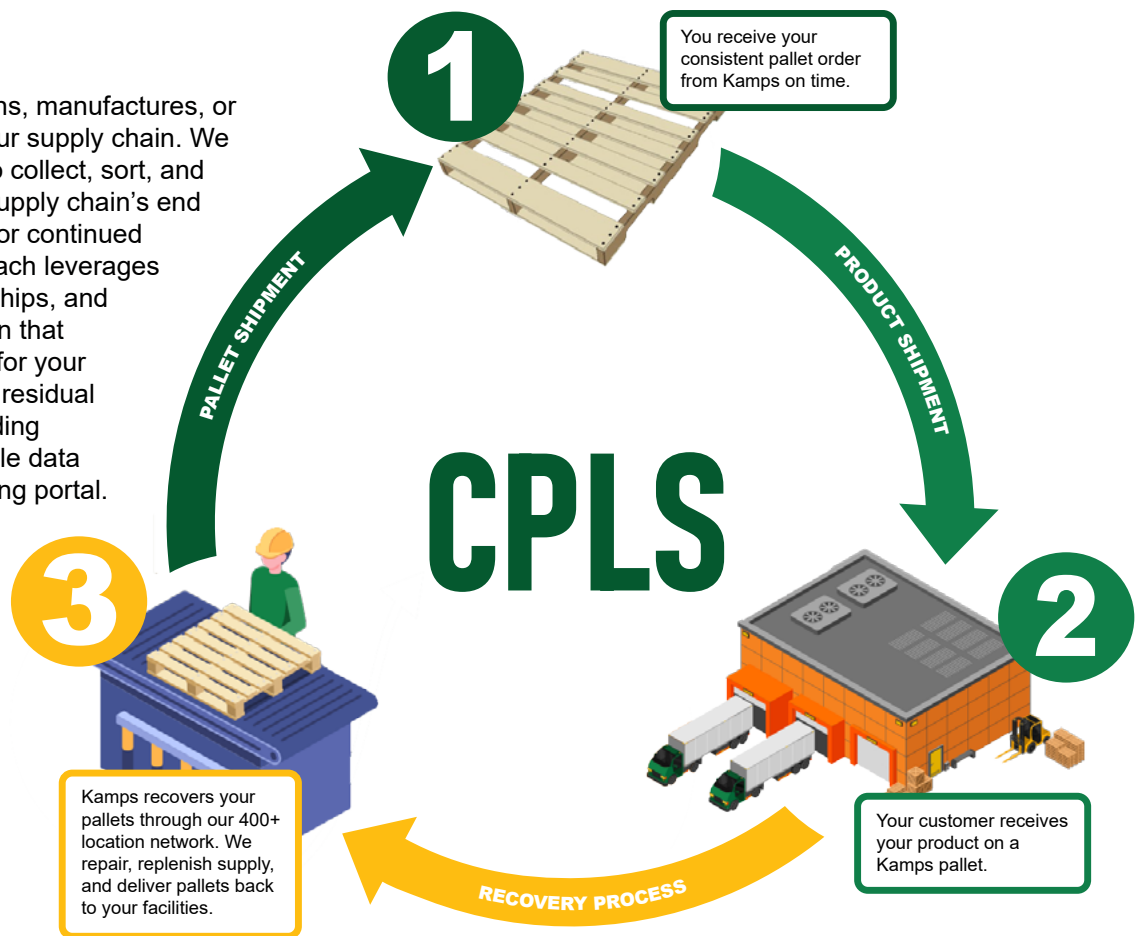

WHAT IS CPLS?

Kamps' team of experts designs, manufactures, or identifies the best pallet for your supply chain. We then utilize our vast network to collect, sort, and repair your pallets from your supply chain's end points, returning them to you for continued service. This integrated approach leverages our expertise, on-site relationships, and capabilities to deliver a solution that continuously generates value for your operations, and manages any residual waste streams, all while providing you with accurate and accessible data through our proprietary reporting portal.

COMPREHENSIVE PALLET LIFE-CYCLE SERVICES (CPLS)

KAMPS CAPABILITIES

NEW PALLETS

Our Pallet Experts manufacture new and custom pallets by designing and building pallets to your specific requirements. Kamps ensures optimal protection for your products during shipping and warehousing.

RECONDITIONED PALLETS

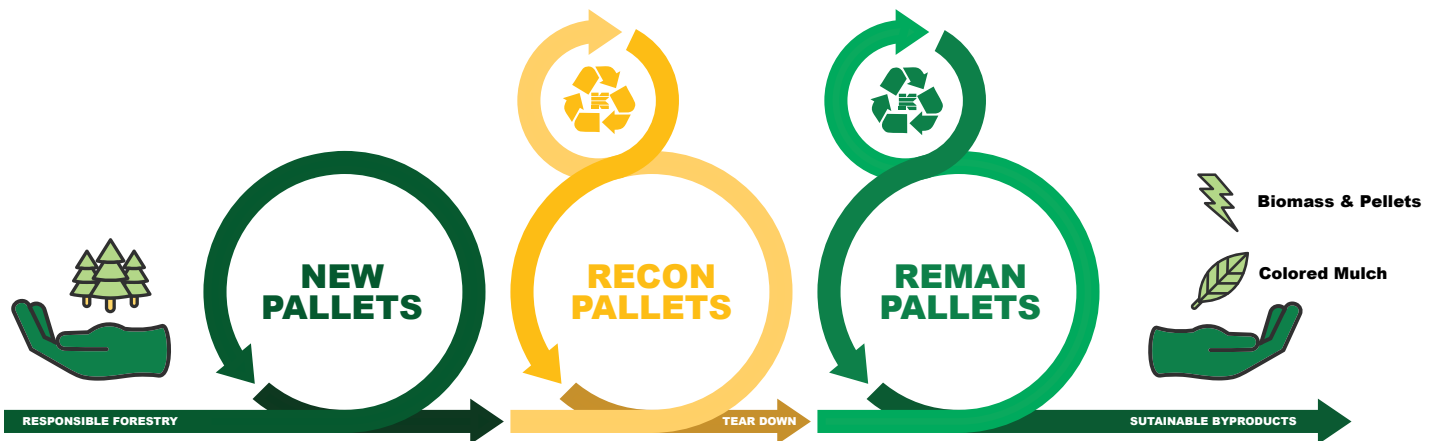

Our industry-leading recovery process repairs slightly damaged pallets, returning them to usable condition and grade. Reconditioned Pallets reduce your dependence on new pallets, leading to cost savings, while minimizing environmental impact through resource conservation.

REMANUFACTURED PALLETS

Kamps' inspection process identifies unrepairable pallets. Our experts efficiently harvest valuable components to remanufacture unique, meticulously crafted pallets using a mixture of new and used components. Remanufactured pallets offer up to 30% cost savings, while minimizing environmental impact through resource conservation.

SUSTAINABLE BYPRODUCTS

Kamps transforms unusable pallets into sustainable byproducts like mulch and biofuel, diverting waste and offering eco-friendly options. Reporting on this data helps us minimize our waste and tracks our customers' impact.
